

PREMIUM

MOTORIZED SPRAYER

Ideal for use in greenhouse, agriculture and pest control.

For 20 years this has been the favorite model for “farmers - entrepreneurs” who seek productivity; Manufactured to work for long hours daily. We have taken care of every detail with cutting age technology, spray lines and shut off valve manufactured in Swissmex, made in Mexico. Make foliar applications of phytosanitary products in a safe, comfortable and reliable way with the PREMIUM models.

- Double outlet nozzle; flat fan and constant spraying for better coverage.
- Extra Large Tank Opening: makes easier to fill, with strainer in order to filter mixtures.
- Pressure regulator: Adjustable, maximum recommended 45 bar (640 psi).
- Tank: 25 L with ergonomic shape, made of high-density polyethylene with UV inhibitor. It has a scale in liters and U.S. gal.
- 2-stroke engine: Japanese-system with electronic ignition system, recirculating carburetor, highly reliable even in leaning positions.
- Shut off valve: Robust design, simple and reliable, with integrated filter and lock for continuous application.
- Pump: double piston, with stainless steel liners and check valves.
- Spray lance: metal with 70 cm (27 ½”) length.
- High pressure hose reinforced with fiber.
- Maximum flow 9.1 l/min.

MAINLY USED FOR:

Insecticides

Herbicides

Desinfectants

Fertilizers

Medical baths for animals

Urban Control

TECHNICAL DATA

SPECIFICATIONS		DESCRIPTION
Dimensions (L x H x W)		38 x 34 x 68 cm
Weight		11.20 Kg
Tank capacity		25 liters
Pump	Type	Double piston
	Flow	9.1 l/min
	Pressure	Ajustable, max. 45 bar (640 psi).
	Nozzle type	NN-D-6 (Standard tip may vary)

SPECIFICATIONS		DESCRIPTION
Engine	Consumption per Nozle	1.16 l/min. per nozzle (20 bar)
	Hose	High working pressure 38 bar/550 psi
	Type	2-stroke air cooled
	Displacement	22.8 cc
	Maximum power	From 1.2 HP --- 0.88 kw/7000 RPM
	Fuel tank	0.750 liters
	Carburetor	Recirculating
	Ignition system	Electronic

BENEFITS:

-Designed to be used easily, comfortably and safely.

-PREMIUM: means that we have taken care of every detail in its design, using resistant materials, so that you can make your applications throughout the day without problems.

-Generates an abundant, constant nebulizer with good pressure for the application of phytosanitary products.

-Make your crops free of diseases and/or pests, if you use quality equipment, that will be reflected in your crop.

Due to interest in technological progress, we reserve the right to make technical changes without prior notice.
