

FIXED HAMMERS TRAILED MILL

This equipment was designed and built using the highest technology and the best materials. The most strict quality controls are implemented during its manufacturing process applying very demanding performance and endurance tests to guarantee a long lasting useful life.

Some of its features are:

- The mill is mounted on a trail axis for an easy transportation.
- Includes a cardan shaft to be powered with tractor's PTO.
- Equipped with powerful fixed hammer system that allows a high milling capacity.
- The hammers are made of a special steel alloy that guarantees an efficient grinding and durability.
- It has two screens: one for stubble and the other for grain. Screens for finer grinding are also available (accessory).
- The two exits of the hopper allow to bag the grinded product in a fast and easy way.
- The power of the mill permits also to take back the hopper and transport the product directly through pipes to silos.

SWISSMEX remains at the forefront in technology to respond to its customers requirements.

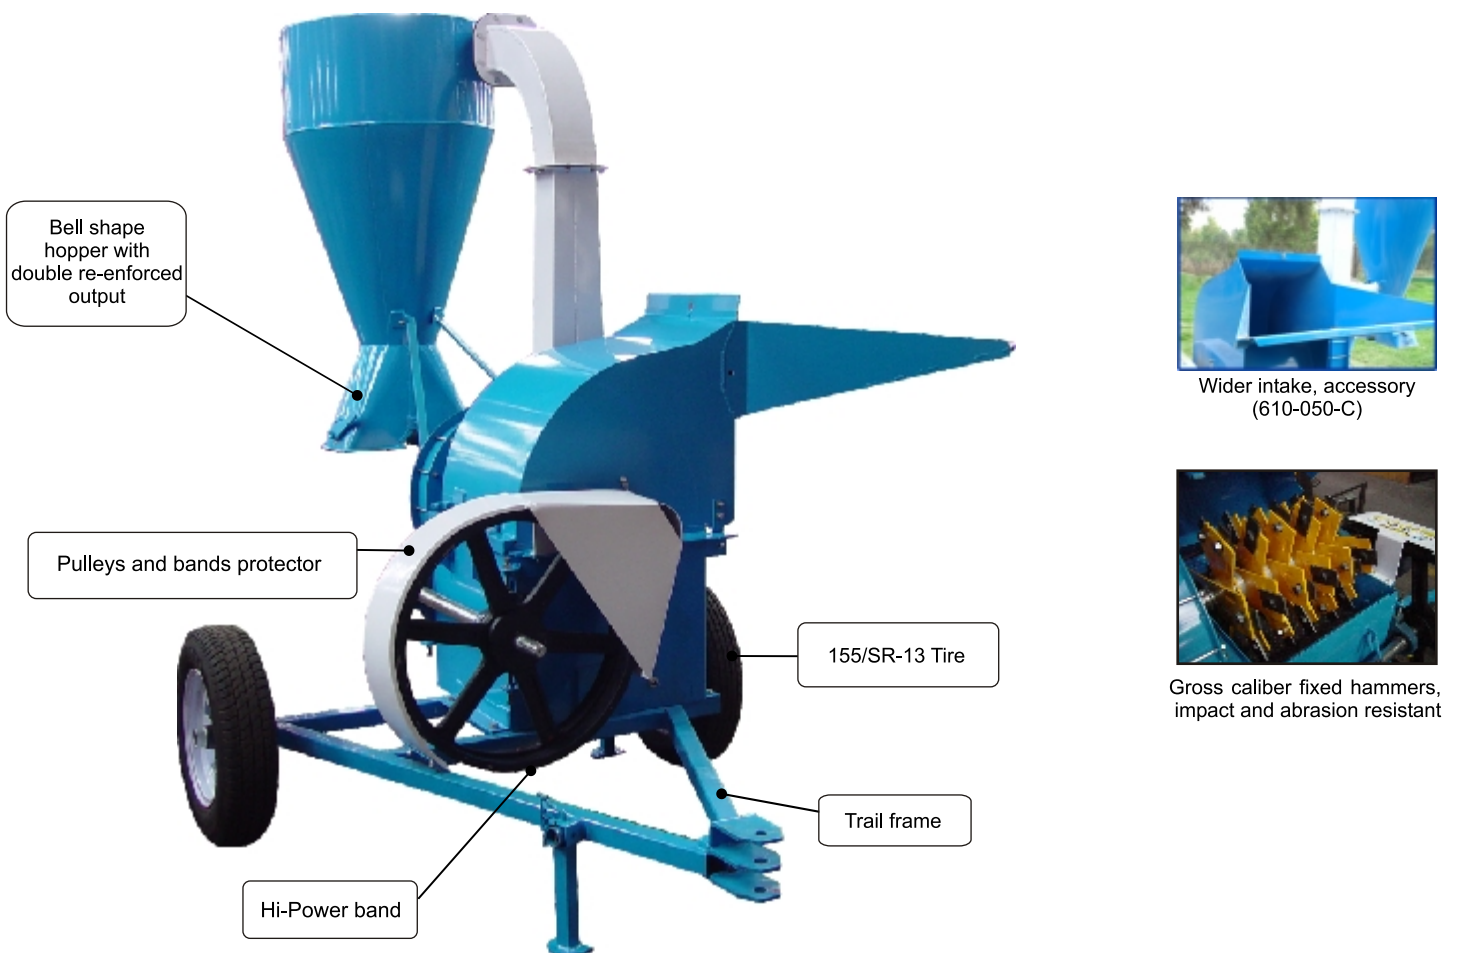

FIXED HAMMERS TRAILED MILL TECHNICAL FEATURES.

SPECIFICATIONS

Suspension	Trailer type
Tractor type	Category II
Power requirement	35 - 70 HP
Speed	3200 R.P.M.
Hammers	32 pcs
Grinding capacity	Up to 100 kg/min.
Length	2.90 m
Width	2.10 m
Height	2.27 m
Weight	510 kg.

In the interest of continuing technological advancement, all specifications are subject to change without previous notice.
